D:\xampp\htdocs\php8x\laravel\core\vendor\laravel\framework\src\Illuminate\Database\Connection.php: 716

```
701     * @throws \Illuminate\Database\QueryException
702     */
703     protected function runQueryCallback($query, $bindings, Closure $callback)
704     {
705         // To execute the statement, we'll simply call the callback, which will actually
706         // run the SQL against the PDO connection. Then we can calculate the time it
707         // took to execute and log the query SQL, bindings and time in our memory.
708         try {
709             return $callback($query, $bindings);
710         }
711
712         // If an exception occurs when attempting to run a query, we'll format the error
713         // message to include the bindings with SQL, which will make this exception a
714         // lot more helpful to the developer instead of just the database's errors.
715         catch (Exception $e) {
716             throw new QueryException(
717                 $query, $this->prepareBindings($bindings), $e
718             );
719         }
```
